

SLIDERS

CAVITY SLIDERS

Cavity sliders provide you with solutions for those openings where space is at a premium such as ensuites, hallway cupboards, kitchen scullery's or dividing living areas.

The door slides back into the wall cavity making it virtually disappear when opened.

- Available in standard sizes suitable for 1980mm high x 610-910 wide doors.
- We are also able to manufacture a cavity for doors up to 2400mm high and 1200mm wide.
- Each cavity slider door uses a track system that ensures the door will never run off the rails and that it slides easily and quietly time after time.
- The cavity slider unit has 2 opening options:
 - It can fully disappear into the pocket.
 - If the requirement is for the door to protrude then stops can be fitted to the back edge of the door before fixing the Gib.
- Each cavity unit and door is provided assembled ready for your builder to install.
- Door jambs are available in pine, or rimu with either grooved jams (suitable for Gib) or flat jambs (suitable for architraves).

TRIM SIZES (ALLOWING A 10MM PACKING GAP)

Door Size mm	Trim Size Single mm	Trim Size Double mm
1980 x 610	2070 x 1265	2070 x 2480
1980 x 660	2070 x 1365	2070 x 2680
1980 x 710	2070 x 1465	2070 x 2880
1980 x 760	2070 x 1565	2070 x 3080
1980 x 810	2070 x 1665	2070 x 3280
1980 x 860	2070 x 1765	2070 x 3480
1980 x 910	2070 x 1865	2070 x 3680

SURFACE SLIDERS

A Surface Sliding Door is a door which is mounted onto the wall or ceiling and slides across the surface of the wall.

Surface Sliding Doors are ideal when you cannot create a cavity but have suitable wall space that allows you to gain the space saving attributes of a sliding door OR where the door is wanted to be featured.

Each surface sliding door uses a unique track system that ensures the door will never run off the rails and that it slides easily and quietly time after time. They have a visible track with a 'pelmet' which is a cover which hides the wheels and workings of the sliding track.

Most door styles can be used with surface sliding track systems.
